Recommendations and Insights

Summary of Key Findings

- High delivery times are weakly correlated with lower average ratings.
- Higher-priced restaurants tend to have slightly better ratings.
- Total number of ratings is not a strong predictor of average rating.
- Popular cuisines vary significantly by city, with Indian and Fast Food being the most common.

Actionable Business Recommendations

- Improve delivery times by optimizing routes and increasing delivery staff in high-demand areas.
- Focus marketing efforts on high-performing cities and areas with high customer satisfaction.
- Implement competitive pricing strategies based on city-specific insights.
- Enhance customer feedback mechanisms to address issues promptly and improve overall service quality.
